Things you need to know before you invest

These funds invest in equities and bonds. Prices can rise and fall, so you might not get back what you invested. The funds invest in overseas markets, so changes in exchange rates can affect the value of your investment. The funds invest in emerging markets, which can involve higher risk of loss than investments in developed markets. Please make sure you read the fund fact sheet before you invest. Past performance is not a guide to future performance. If you're not sure about the suitability of any investment, you should speak to an authorised financial professional.
